- Open Platform for All Industries and Participants

<http://enactjs.com/>

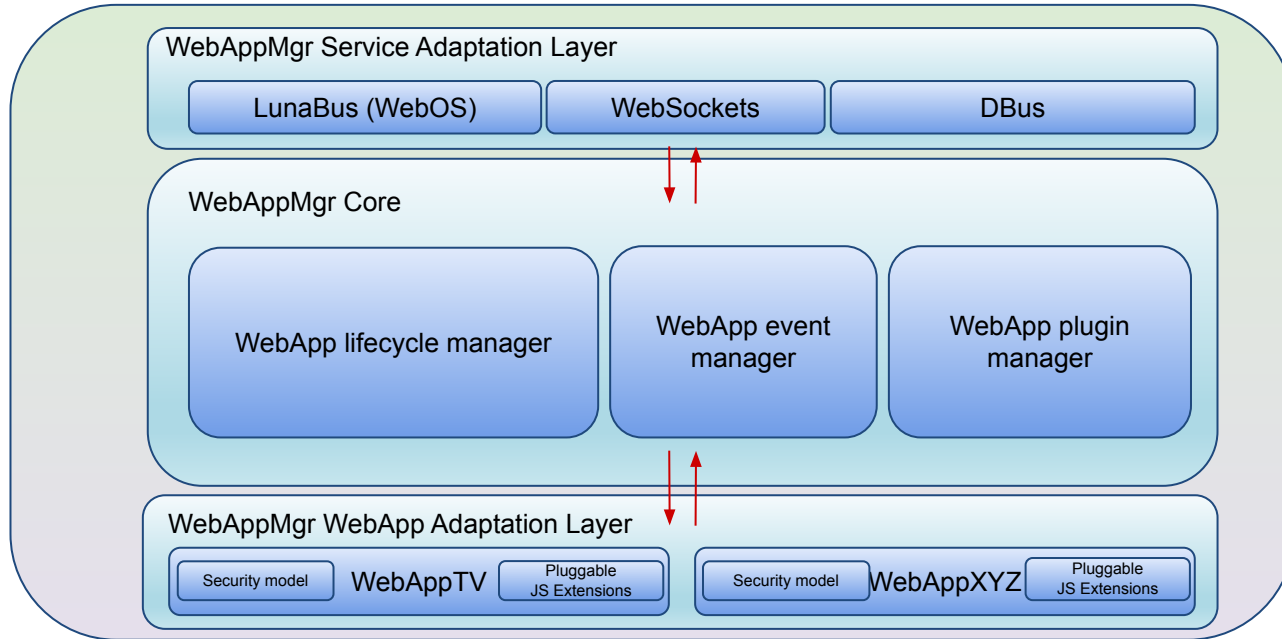

# How is Chromium used in LG products

<https://github.com/webosose/chromium53>

# Customizable webOS WebApp Runtime

## WAM

<https://github.com/webosose/wam>

# LG's focus in 2017-18

## → Areas we are currently contributing

- ◆ webOS Open Source Edition Web Stack (<http://webosose.org>)
- ◆ GCC support maintenance
- ◆ meta-lg-webos Yocto layer for X11 official releases
- ◆ [New/legacy Ozone Wayland](#)
- ◆ Suspend/Resume
- ◆ Memory optimizations

## → What areas we are focused next

- ◆ IME
- ◆ Ozone wayland
- ◆ memory tracing
- ◆ Accessibility
- ◆ Spatial Navigation

# LG Chromium contributors

- Gyuyoung Kim (gyuyoung.kim@lge.com) – Refactoring/webOS Features/Bugs
- Jose Dapena Paz (jose.dapena@lge.com) – webOS Features/Accessibility
- Jani Hautakangas (jani.hautakangas@lge.com) - Graphics
- Andre Rosa (andre.rosa@lge.com) – Performance/Memory
- Junho Seo (junho0924.seo@lge.com) – Misc Features/New Standards
- Wanchang Ryu (wanchang.ryu@lge.com) – Misc Features/New Standards

## LG commits in 2017-18

Total Commits Landed: 182

Total Authors: 11
